Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Drawings

1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The abstract of the disclosure is objected to because it contains legal phraseology (the phrase "the umbrella comprises..."). Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "the cover to it" in Claim 1 renders the

Art Unit: 3636

claims unclear. The "it" appears to be the rib previously recited, but the applicant should specifically name the "it" intended to be attached to the strip portions. Claim 3 recites the limitation "said channel" in line 3 of the claim. There is insufficient antecedent basis for this limitation in the claim. Claim 5 recites the limitation "said channel" in line 3 of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by You in US Patent 6173724. You discloses an umbrella with ribs (comprising 13, 23, and 4) having a saw-tooth profile on the trailing edges of which are fixed strip portions (15, 25) of the cover, each of said ribs having a structural shape (13) and a plurality of saw-tooth components (161, 14) engaged with the structural shape and capable of fixing the strip portions to the rib.

7. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Ko in US Patent 6089244. Ko teaches an umbrella with ribs (comprising 3 and 6) having a saw-tooth profile on the trailing edges of which are fixed strip portions (32, 33) of the cover, each of said ribs having a structural shape (3) and a plurality of saw-tooth components (6, 35) engaged with the structural shape and capable of fixing the strip

portions to the rib. Ko further teaches that the structural shape has a channel (4) with a narrow slot (43) and that the saw-tooth components have an appendage (the end of component 6 inserted in channel 43) which can be received in the channel.

Allowable Subject Matter

8. Claims 3-14 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chen and Lee teach saw-toothed wind-alleviating umbrellas. Kowalski teaches an umbrella with strip portions.
